LIFE COLRECEPS attended to a 2015 LIFE Programme Workshop

Posted on Wednesday April 8th, 2015 by administrador

The 8 April took place in the University of Palencia a workshop for the preparation of LIFE Proposals, which was organised by the University of Valladolid in association with the Fundación General de la Universidad de Valladolid. More than 30 professionals from the environmental sector attended to this conference, being also followed in streaming by many organisations interested in the LIFE Programme.

The project LIFE Colrecepts had the opportunity of participating in a round table discussion with other three LIFE Projects (LIFE Integral Carbon, LIFE Green Deserts and LIFE Operation CO2), where good experiences were shared and the first results of these projects were presented.

Sorry, nothing found.
